

PRESS RELEASE

EcofinConcept markets a further 749 kWp solar park to a private investor

Hückelhoven, August 5, 2019 – EcofinConcept GmbH, the specialist for renewable energy projects, has marketed another solar park to an investor from northern Germany.

Within a very short time, the 749 kWp solar plant was built turnkey and successfully put into operation in June. The plant was built in a commercial area with a legally binding development plan Solar in Saxony-Anhalt.

The outdoor plant was equipped with crystalline 275 Wp Sharp modules and inverters of the Huawei Sun 2000 series. Long-term product warranties of 10 years for the solar modules and 5 years for the inverters have been finalized. In addition, there is a 25-year linear performance guarantee for the modules. Daily system monitoring is ensured by an Internet-based monitoring system from Plexlog.

“The successful marketing of the solar park proves once again that solar farms built in Germany in 2019 are attractive to investors despite sharply lower tariffs compared to previous years.”, Said the managing directors of EcofinConcept Christian Sperling and Guido Vieten.

According to the latest Renewable Energy Sources Act (EEG), the annual energy production of around 766,000 kWh is paid at around 7.9 cents per kilowatt hour.

Further solar projects and suitable locations are being sought for the expansion of power plant portfolio.

About EcofinConcept: EcofinConcept GmbH specializes in renewable energies. In addition to traditional consulting services, the range of services includes, in particular, the acquisition of existing and turnkey projects for private and institutional investors, project development, commercial due diligence and the development of investment opportunities.

References in short: project management, conception, development, structuring, financing and / or marketing of more than 85 projects with a total investment volume of more than 590 million EUR and an installed nominal capacity of almost 365 MW. Own power plants are operated in subsidiaries and sister companies.
