BEST PERFORMANCE BY THE TINY

The GeBE-MULDE Mini is a very compact panel printer for stationary and mobile applications. The standard paper width is 58 mm. Based on space availability, there are two options: for paper rolls with 31 mm or 60 mm diameter. A wide operating power range of 4.5 V to 8.5 V or 10 V to 36 V offers flexibility in choosing a power supply. It enables printer operation in machinery, vehicles or switch boards.

The printer is easily installed in a frontal cut out. That reduces development cost. Versions with DIN housing match typical standard cut outs for instance in switchboards or control cabinets. The available front cover offers dust and splash water resistance per IP 54.

You can give the GeBE-MULDE Mini your personal touch by choosing your company colour and logo for the housing and the design foil. Customization available starting with small production series.

The GeBE-MULDE Mini handles an energy efficiency via intelligent power management. Frequent power on and off cycles can be avoided.

The power down mode keeps the printer active with a current consumption of almost 0 mA. This guarantees a maximum endurance of the single battery cells or the battery pack. Therefore, the printer is also suitable for operation with a corresponding battery pack or single cells.

The 31 mm paper roll enables printing on up to 10 m of paper. The printer version with 60 mm diameter paper roll increases paper stock by a factor of four. This spells flexibility in your choices.

You print text, graphics or bar code with a resolution of 203 dpi – on standard paper as well as on self-adhesive labels.

Operation in verhicles: Neither vibration nor voltage peaks interfere with the printer.

The panel printer offers great versatility paired with individual design customization.

- Mobile or stationary printing
- Cost effective and space saving front mounting
- Variable housing sizes and paper roll diameter
- Standard DIN format housing available
- Time saving paper handling
- Customization available starting with small production series

Form printing

Custom design

Mobile operation
& low power standby

A8 Controller A8

C32 Controller C32

Space saver with small paper roll.

The 60 mm diameter paper rolls increases paper stock by four-times.

The mini printer in DIN housing can be installed quickly. With the optional door it remains dust and splash-proof.

»Just like my colleagues, I am pleased with the GeBE team.
Order handling is always done quickly, and the so far only customer complaint was handled with competence.
I would recommend GeBE!««

About GeBE

We listen
We will stay in permanent contact to come to a solution together. Reliability, fairness, trust, openness and integrity is the natural basis as to how we do business.

Products, that evolve and improve
Small thermal printers and keyboards of various technologies compose our product focus. Our vast experience with OEM projects enables us to offer a flexible approach to your individual wishes and expectations. Your design – your firmware? We will make our products yours.

All from one source
Sales, development, production, support. You will receive everything from one source, starting with your first inquiry all the way to serial production. We will manufacture in-house and certify per DIN EN ISO 9001, so you receive "Made in Germany" quality. Reliable, long-lasting and at fair terms.
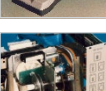

We expand our know-how
Since 1975 we have developed input and output devices including hardware and software. We constantly apply the newest state of technology and our vast knowledge, so we can accompany you through the development of your I/O application.

You produce yourself?
Even if we do not assemble for you, we will still develop your device or product.

Industry Leading Developments

Year	Development
2017	GeBE Linerless Technology for almost residue-free printing and cutting of linerless papers.
2015	GeBE-PRINTER LAB® for testing hardware in thermal printing systems and thermal papers.
2012	Intelligent HMI through use of GeBE-INDICO®-Designer GUI.
2011	First mobile Bluetooth® printer for iPhone®, iPad® and iPod®.
2004	First 4" panel printer as an alternative to standard DIN A4 desktop printers.
2001	First panel printer fabricated without screws, with Easy Loading Technology.
1997	Dot-matrix printer without fixated counter bearing for document printing.
1994	Prescreption printer with paper turn-over unit for two-sited printing. Basic technology for GeBE-MOTION®.
1990	First battery powered printer for mobile use.
1989	Cassette printer with dot-matrix technology and paper cutter for thick cards.
1985	Plotter for labeling of small signs (serial terminals).
1974	Rotate and swivle-mounting test adapter including bridges for testing purposes.
1965	Instrument for measurement of hydrated layers in photographical film material.
